

Known failure condition
Social death
Wicked problem
Empowerment
Dirty work
Dignity work
Dignity erosion
Performance of desire
Survival knowledge suppression
Information asymmetry enforcement
Lifestyle–payment contradiction
No supply-side research = no informed consent
Demand-side dominance
Supply-side invisibility
Participation pressure
Sequential lock-in
Narrative stabilization
Reinforcement inversion (validation → stigma flip)
Transaction obscuring
Social exclusion
Empathy collapse
Ego threat / ego protection
Demand entitlement vs supply consequence
Boundary punishment
Stigma transfer
Gold digger framing
Sex weirdo framing
Forced identity binary
Choice deflection (“you chose it”)
Ego-protective denial
Foreseeability
Diffuse responsibility
Vicarious liability
Institutional omission
Disclosure gap
Material risk non-disclosure
Lifecycle opacity
Cognitive delay mechanism
Social feedback suppression
Regret suppression
Comment enforcement
Narrative policing
Regret invalidation system
Terminal silencing mechanism

Governing Condition — Foreseeability
Signal Distortion at Entry
Transaction Recognition Failure at Entry
Decision Perception Distortion
Outcome Distribution Distortion
Pre-Entry Normalization
Neuro-Functional Override
Signal Saturation at Entry
System-Level Outcome Structuring
Violence and Coercion Signal Suppression
Entry Condition Failure
Common Sense Displacement Condition
Selective Application of Science Condition
Behavioral Model Inconsistency Condition
Cultural Override Condition
Wicked Problem Condition
Outcome Non-Disclosure
Control of Entry Conditions
Incentive Structure
Outcome Allocation
Narrative Aspiration Distortion
Cross-Segment Continuity
Pipeline Continuity
Competitive Escalation
Structural Convergence
Empathy Suppression Mechanism
Reality Locks
Consent Clarification
Outcome Proof
Liability Implication
Final System Condition

FINAL STRUCTURE (LOCK THIS)

Target 1: Platforms

- monetize participation
- control entry + disclosure

Target 2: Schools

- shape pre-entry understanding
- fail to translate known risk into usable models

Before entry → Schools

At entry / during participation → Platforms

“This is not about culture or individuals. It is about institutional actors that control pre-entry conditions and participation environments.”
