

SAME START (centuries)
attention → labeling → reinforcement → classification
(stigma forms for both)

↓
(≈ last 20 years: capacity appears)
▼

DECISION POINT

————— apply early classification —————
————— withhold early classification —————

signal = named harm	signal = "play / normal"
record = starts	record = none
incidents = linked	incidents = isolated
peers = interrupted	peers = reinforce

knowledge = allowed	knowledge = redefined
credibility = intact	credibility = degraded

stigma = contained	stigma = produced
--------------------	-------------------

identity = flexible	identity = fixed
---------------------	------------------

adulthood:	adulthood:
- event-level harm	- identity-level harm
- individual evaluation	- type-based treatment
- credibility intact	- credibility pre-damaged
